

# Smiling George

Here's the funniest origami model I've ever seen, one that anyone can do... well.. anyone with an American dollar on hand. But if you haven't got \$one\$, just use any piece of paper with a face on it. It won't be George but still bound to be funny nonetheless.

Traditional North American model.  
(Must be!...no one else plays so much with their money!)

Diagrammed by Jeremy Shafer ©1999

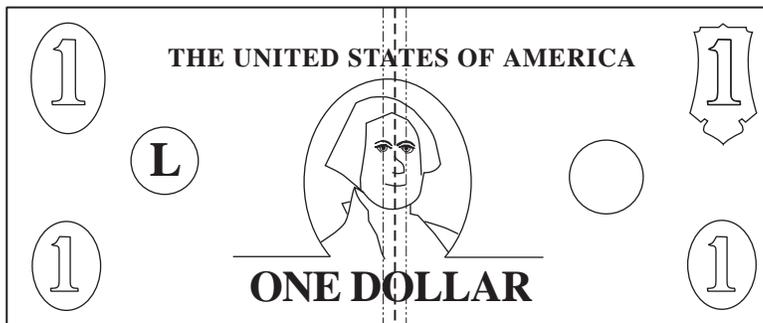

1

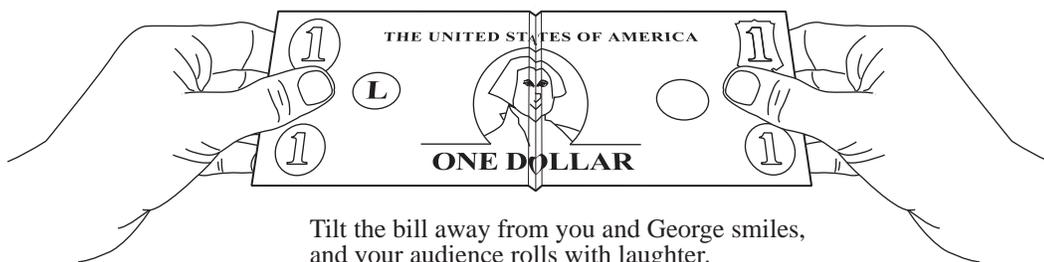

Begin with \$1. Coins won't work.  
Make two vertical Mountain-folds that intersect the pupils of eyes.

2

Put a vertical valley fold exactly in the middle of the two mountain folds.

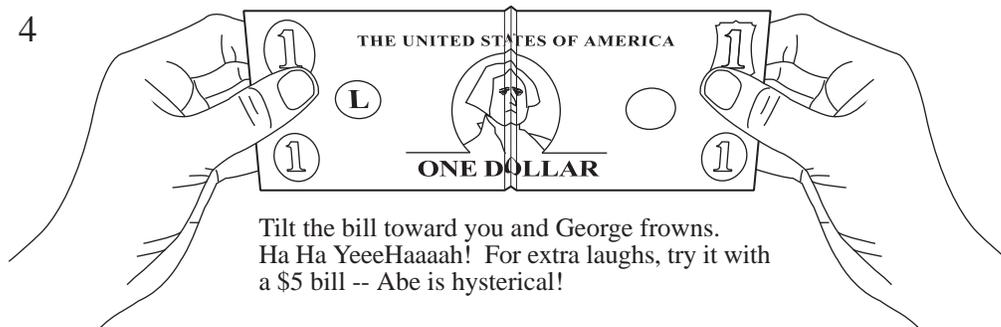

3

Tilt the bill away from you and George smiles,  
and your audience rolls with laughter.

4

Tilt the bill toward you and George frowns.  
Ha Ha YeeeHaaaah! For extra laughs, try it with  
a \$5 bill -- Abe is hysterical!
