

Stellated Octahedral Clown Nose

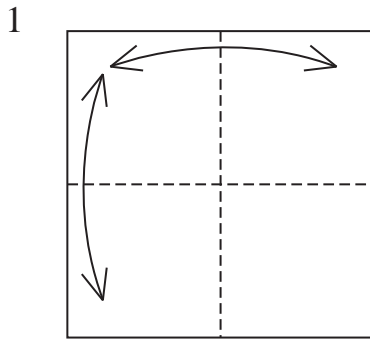

Clown Nose

By Jeremy Shafer ©2000

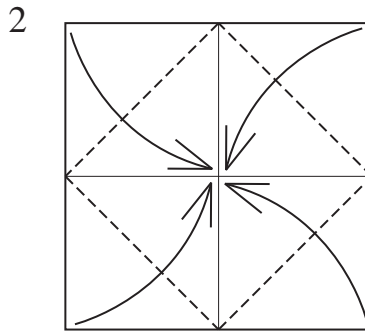

Kiss your foam and plastic noses goodbye, and say hello to PAPER! Now you can make a wide variety of clown noses using origami. This simple model, made from one square no cuts, attaches onto your nose without the use of adhesive or surgery!

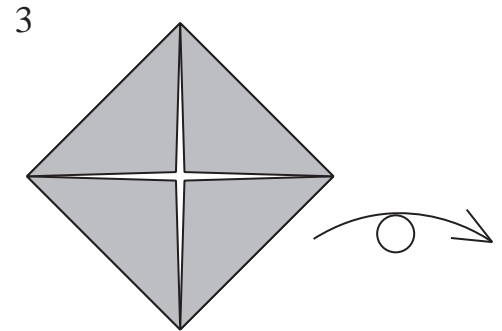

Your basic everyday origami clown nose

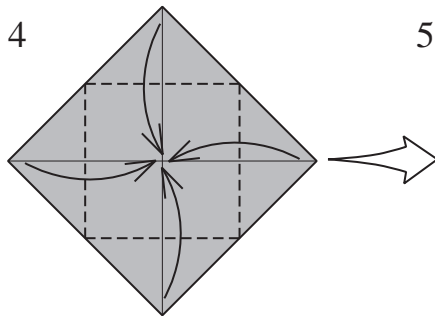

The noses pictured above were folded from 7-inch paper. White side up, valley-fold and unfold.

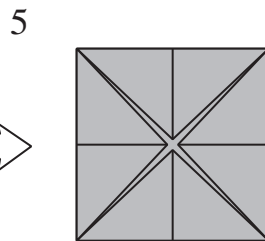

Blintz!

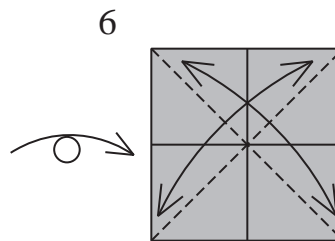

Turn over.

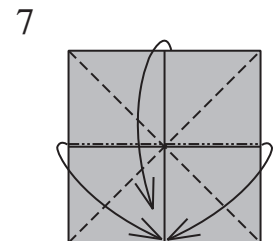

Blintz again!

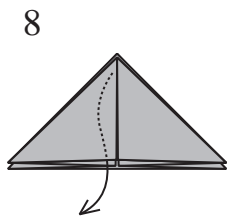

Turn over again.

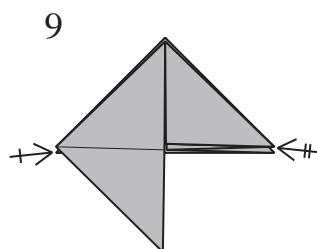

Valley-fold and unfold diagonally in half both ways.

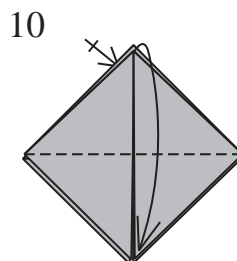

Fold a waterbomb base.

Reach in and pull out one flap.

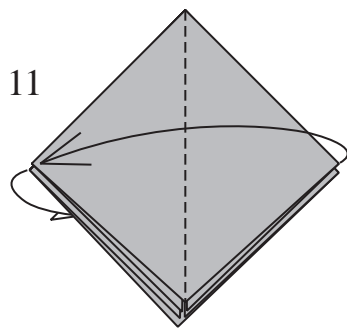

Reach in and pull out the other three flaps.

Fold the front flap down. Repeat behind.

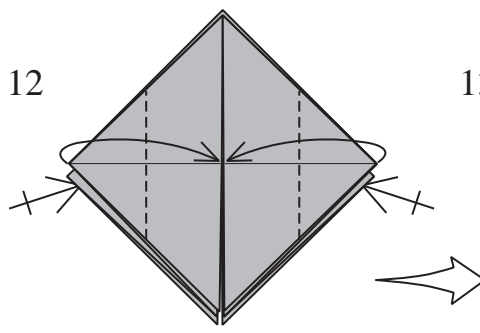

Flying Running Nose

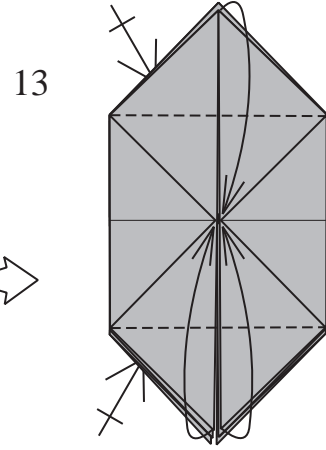

11

Swing the front right flap leftward, and balance this out by swinging the rear left flap rightward.

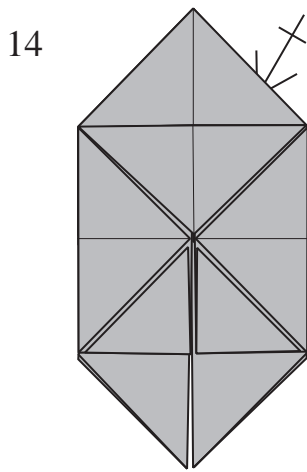

12

Valley-fold the near left and right corners to the center. Repeat behind.

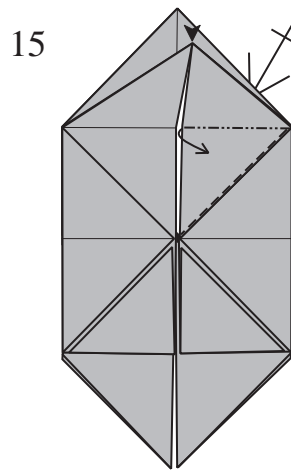

13

Valley-fold three flaps to the center. Repeat behind.

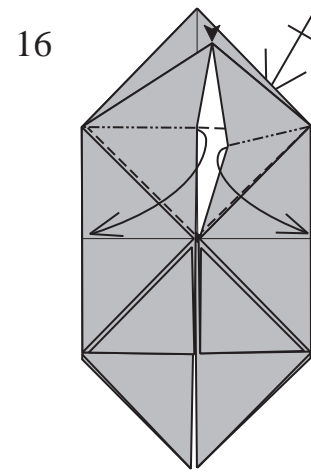

14

Unfold the flap.

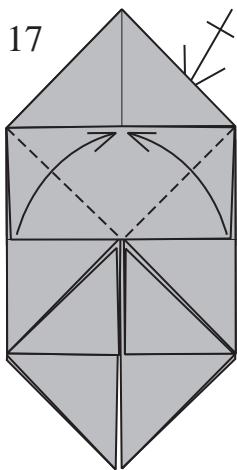

15

Reaching in, pull the raw edges downward and toward the sides. Squash to flatten. Repeat behind.

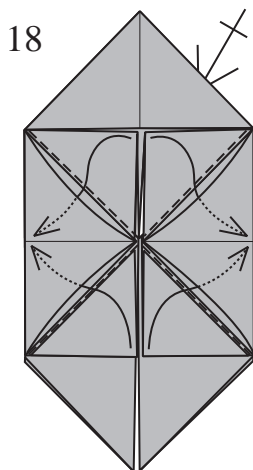

16

In progress.

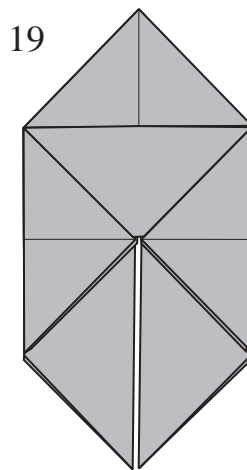

17

Valley-fold the two flaps. Repeat behind.

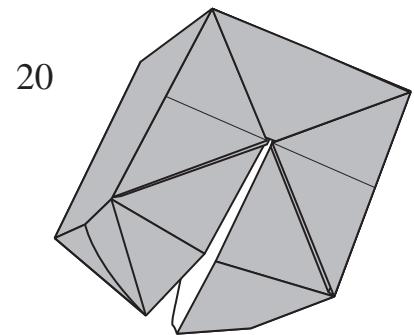

18

Insert the four triangular flaps completely into the pockets. Repeat behind.

19

Puff out the nose by inserting a finger inside. Don't worry, deep-tissue nose picking is in order here.

20

The Clown Nose is folded and ready to be worn. Simply insert your nose into the slot and adjust for comfort. To avoid nasal paper cuts, you might want to mountain-fold along the raw edges of the slot. To make the Stellated Octahedral Nose, apply pressure on the middles of all edges of the cube and pinch to define the new edges.
